

Online Time Sheet

How to install the Time Sheet online

How to Install the Time Sheet Online

- 1- Install the **IIS** on the server

- 2- Install the **.Net** framework on the server

- 3- Copy the **WebSetupTS** folder on the server to install the website
 - 3.1- Open the **Release** folder, double-click on the **setup.exe** and click **Next**
 - 3.2- Set the **Virtual Directory** value to TimeSheet and the **Port** value to 80
 - 3.3- Click **Next**, then **Next**
 - 3.4- Wait to install the website and then click on **Close**

- 4- Check if the two dlls **msvcr70.dll** and **msvcp70.dll** exist in the system folder (**C:\WINNT\system32**)

- 5- Change the **ConnectionString** (under **<appSettings>** element) value in the **web.config** file. Set the **Data Source** value to the database's server name and set the **Initial Catalog** value to the database name.

- 6- Change the **ReportsPath** (under **<appSettings>** element) in the **web.config** file to the physical path of the reports folder in the application. It should be the physical path of the server (c:\inetpub\wwwroot\) concatenated with the name of the virtual directory (TimeSheet\) and reports folder name (Reports).

For example: C:\inetpub\wwwroot\TimeSheet\Reports

- 7- Change the **ExportPath** (under **<appSettings>** element) in the **web.config** file to the physical path of the export folder in the application. It should be the physical path of the server (c:\inetpub\wwwroot\) concatenated with the name of the virtual directory (TimeSheet \) and export folder name (Export).

For example: C:\inetpub\wwwroot\TimeSheet\Export

- 8- Install MS Office on the server (Microsoft Excel), if it does not exist.

- 9- Go to the folder:
"C:\Program Files\Microsoft Visual Studio .NET"
Give the ASPNET user a full control in this folder.

N.B: the name of the server shouldn't be more than 14 characters.
